

Focus on Your Pet's Dental Health with our Dental Health Plan

If you schedule your pet's dental cleaning for sometime within the next 30 days, you will get:

- A **10% discount** off of the regular cost of a dental cleaning/polishing, IV catheter/fluids, and dental x-rays!
- A complimentary comprehensive pre-surgical exam (a \$47.70 value).
- A savings of up to approximately \$80!

Any additional services beyond the comprehensive exam, dental cleaning/polishing, IV catheter/fluids, and dental x-rays are regularly priced. This 10% discount is a one-time offer and will not be offered again for at least 1 year. This program may not be continued in the future.

By age 3-5 years, 70-80% of animals show signs of poor dental health. This means your pet could be experiencing *pain, tooth loss, infection and even increased bacteria in the bloodstream*. Dental disease progresses with time and can lead to significant problems with their overall health. With regular cleanings, we can identify and treat issues early and prevent more serious health problems.
